CATALOG 2025
Spring

The image shows a large wall in a modern office space, covered in light-colored, wavy, textured panels. The panels have a distinct, undulating pattern that creates a sense of movement and depth. The wall is set against a dark background, and the floor is made of light-colored wood. In the background, a glass-walled office is visible, with a desk and a chair. A security camera is mounted on the ceiling in the upper right corner.

SUSTAINABLE FUTURE**

WOODFLOW-SKIN
BY

Paolo Mauri

A Visionary Collaboration

Great design starts with a strong point of view. Paolo Mauri brought his, and together, we took it further. Inspired by his work in luxury hospitality, we translated his sketches, moodboards, and architectural instinct into a new language of surfaces.

The result? Signature designs within our **Maxi panel collection**—our tallest Woodflow-skin panels to date. At 2.6 meters, they create seamless, floor-to-ceiling compositions with effortless fluidity. **Sophisticated, precise, and bold**, this collection is a new benchmark in material design.

MAXI PANEL MODELS

Our models in 2600 x 600 mm.

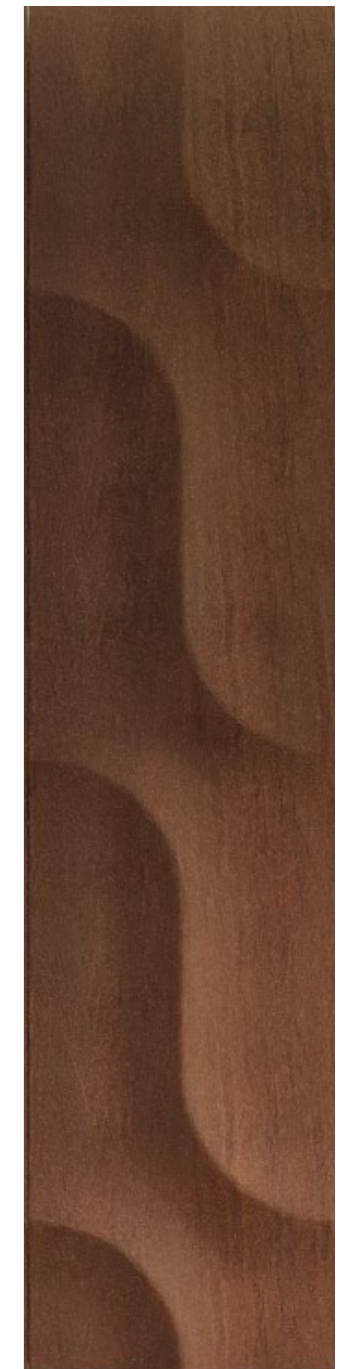

Ellipse

Sprout

Ridge

Big Groove

MODEL ELLIPSE 

Dimensions: 2600 x 600 mm.

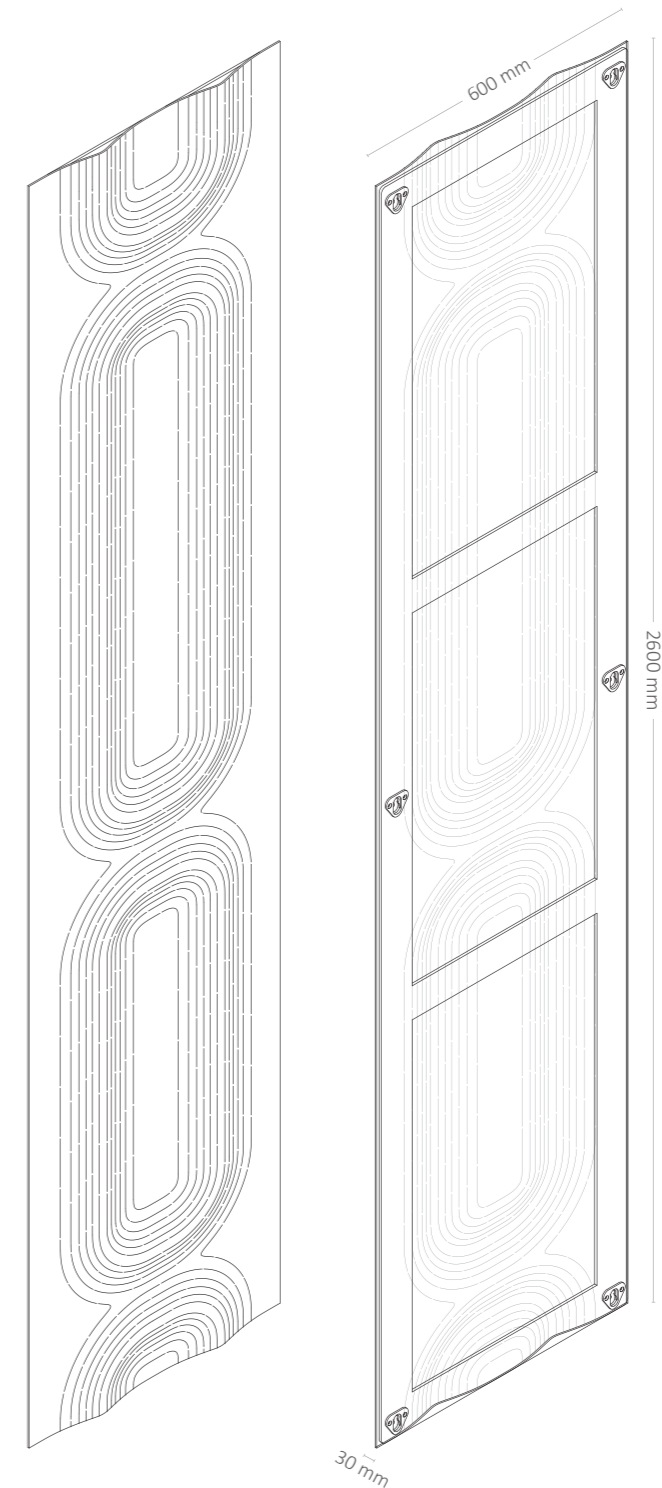

Shell Thickness: 3 - 6 mm.

Shell Material: ~88 % wood from multiple species ~ 12 % binder

Frame Material: 5.5 mm MDF
